

ANGELFACE®

Angelonia hybrids

ANGELFACE® Dresden Blue
Angelonia hybrid *Ansky USPP17155 Can3283

ANGELFACE® White
Angelonia hybrid *Anwhitini USPP19866 CanPBRAF

Angelface varieties are prized as vertical accent plants everywhere. Undoubtedly the finest Angelonia on the market, Angelface varieties are semi-upright with a good branching habit, have extra large, brilliantly colored blooms, and thrive in hot, humid conditions. These beauties make the perfect summer gallons.

Growing Tips:

Self-cleaning, no deadheading necessary. Grow under warm conditions. 60° F. or higher. Preventative drench with Subdue Maxx, Cleary's Biweekly drench with S.T.E.M.

Exposure: Full sun

Height: 18-24"

Spacing: 12-14"

Hardy Temp: 30°F (-1°C)

Uses:

Use in combinations, window boxes and landscaping.

Features:

Blooms all season; heat and drought tolerant plants; grape-scented foliage; low maintenance. Deer resistant.

Superior Rating, Disney; Top Performer, Ohio State; Excellent Rating, Boerner Botanical Garden, Milwaukee, Wisconsin; Best of the Best, University of Georgia; Best Varieties, Penn State

Growing Tips for ANGELFACE®

- Requires high light in production.
- Needs 150-250 ppm fertilizer for optimal growth.
- Warm and slightly dry conditions after transplanting speeds root-in and growth.
- Blue is more compact and 1-2 weeks earlier to flower than others in the series.

Additional Culture Information for ANGELFACE®

| | |
|------------------------|--|
| pH/EC: | 5.8 - 6.2 / .6 - .9 |
| Growing Temperature: | 65-72°/70-75° |
| Holding Temperature: | 60-65° |
| Water Requirements: | Moderate to Moist |
| Planting and Timing: | Late Spring through Summer Finish. Standard Plants Per Pot. |
| Finish Times in Weeks: | For 4-5", 5-7; for 6"/gallon, 7-8; for 8", 7-9; for 10-12", 10-14 |
| Spring Outdoor Finish: | Do not finish outside |

Notes:

Pinch 6" or larger pots at transplant for large plugs, 2 weeks after transplant for smaller pots. Florel® causes tip burn and distorted growth. Sumagic® is effective (2-5 ppm), but other growth regulators can delay flowering.
