DIAMOND FROST®  
*Euphorbia hybrid* 'INNEUPH01A' USPP17567 Can2830

A just-about-perfect variety that has everyone talking – from growers to retailers to consumers.

**Growing Tips:**

Diamond Frost is moderately salt tolerant – it can withstand the amount of salt encountered when planted 30 feet or more from the source of the salt. Self-cleaning, no deadheading necessary. Some shedding of flowers and leaves may occur indoors depending on light levels and watering.

**Exposure:** Sun or partial sun

**Height:** 12-18"

**Spacing:** 10-12"

**Hardy Temp:** 40°F (4°C)

**Uses:**

Plant alone or in combinations in all container types and landscapes.

**Features:**

Heat and drought tolerant; clouds of airy white flowers all season; low maintenance; deer resistant.

**Winner of 146 Awards:**

Including: Rising Star, Dallas Arboretum; Best of the Best, University of Georgia; Superior Rating, Colorado State; Top Performer, Ohio State

### Growing Tips for DIAMOND FROST®

- High light is required in production.
- Needs 200 ppm fertilizer for optimal growth.
- Preventive fungicides are recommended at transplant.
- Warm and slightly dry conditions after transplanting speeds root-in and growth.
- Can have an adverse reaction to shipping in a box, but even plants that look bad will rebound in a short time.
- Severe dry down can cause foliage to drop; however, the plant will recover.
- Benefits from a light shearing 2-3 weeks after transplanting.

### Additional Culture Information for DIAMOND FROST®

- pH/EC: 5.8 - 6.2 / .6 - .9  
Growing Temperature: 65-72°/65-72°  
Holding Temperature: 50-60° outdoors  
Water Requirements: Moderate to Moist  
Planting and Timing: Early Spring through Summer Finish.  
Standard Plants Per Pot.  
Finish Times in Weeks: For 4-5", 4-6;  
for 6"/gallon, 5-7;  
for 8", 7-9; for 10-12", 10-12  
Spring Outdoor Finish: Do not finish outside

### Notes:

- No pinch necessary, but plants can be pinched to shape.  
Winter flowering occurs in Sunbelt states.  
May be sensitive to Florel®.  
Growth regulator suggested –  
Sumagic, 2 weeks after transplant.
