

LUSCIOUS®

Lantana hybrids

LUSCIOUS® Lemonade
Lantana hybrid *Robp/worm USFP19349 Can3636

This series adds vibrancy, flower power, and exceptional performance to the continuous blooming that Lantanas are known for. The impressive quartet will win you over with their bright colors and heat and drought tolerance. These exceptionally vigorous growers are butterfly and hummingbird magnets and require no deadheading. Day-length neutral.

Growing Tips:

Lantana seed set varies considerably. If you see a lot of berries developing, you may want to deadhead the plants to help with continuous

blooming. If there is low berry set, deadheading shouldn't be necessary for continuous bloom. Some varieties are self-cleaning.

Exposure: Full sun

Height: See next page under variety photos.

Spacing: 16-22"

Hardy Temp: 32°F (0°C)

Uses:

Use in combinations, window boxes, and landscaping.

Features:

Heat and drought tolerant with multicolored

LUSCIOUS® varieties:

LUSCIOUS® CITRUS BLEND™
Lantana hybrid 2003.301 USPP19706

Height: 24-30"

LUSCIOUS® Grape
Lantana hybrid Robpwpur USPP19357 Can3537

Height: 10-14"

LUSCIOUS® Lemonade
Lantana hybrid Robpworm USPP19349 Can3636

Height: 10-14"

LUSCIOUS® 'TROPICAL FRUIT'™
Lantana hybrid USPP18821 Can2884

Height: 8-24"

Growing Tips for LUSCIOUS® Lantana

- Needs 200 ppm fertilizer for optimal growth.
- High light in production is essential.
- Warm and slightly dry conditions after transplanting speeds root in and growth.
- Use caution with Florel®, as it can cause leaf drop and leaf curl.
- For best results, northern growers may want to order first shipments in mid-spring when temperatures and light levels rise. Cold and wet conditions can double crop time.

Additional Notes for LUSCIOUS® Grape Lantana

Luscious Grape is a true trailing variety. This may require an additional pinch to fill out 4-5" containers. Crop time will be about 2 weeks longer than others in the series and can be shortened by increasing the number of liners per pot.

Additional Culture Information for LUSCIOUS® Lantana

pH/EC: 5.8 - 6.2/ .60 - 1.50
 Growing Temperature: 65-72°/70-75°
 Holding Temperature: 50-60° outdoors
 Water Requirements: Moderate to Moist
 Planting and Timing: Spring through Summer Finish.
 Standard Plants Per Pot.
 Finish Times in Weeks: For 4-5", 4-6; for 6"/gallon, 5-7;
 for 8", 7-9; for 10-12", 10-12
 Spring Outdoor Finish: Do not finish outside

Notes:

Pinch at liner planting and pinch to shape as needed. PGRs should not be needed. Winter flowering occurs in Sunbelt states. Avoid dry downs because plant reacts with leaf drops. Watch for whiteflies - preventative treatment with Tristar or Marathon II.
