Product - Vision

The vision of Proven Harvest® is to nurture a world where home gardeners feel empowered, inspired, and deeply connected to the food they grow.

By offering high-quality, innovative edible plants chosen through our **Northstar Criteria**, we aim to bring nutritious, reliable, joy-filled varieties to every garden. Our vision is a gardening experience so rewarding, so effortless, and so full of discovery that consumers instinctively trust Proven Harvest by Proven Winners®.

Rainbow Candy Crush

Northstar Criteria

Nutritious

Great vegetables should do more than delight the palate—they should nourish with purpose. Proven Harvest® seeks out varieties thoughtfully developed not only for exceptional flavor, but for enhanced nutritional value. Each selection is carefully evaluated and supported by expert insight, ensuring every vegetable we offer delivers wholesome goodness the consumer can truly feel good about.

Story

Each variety has a story—a journey that shapes its purpose. Proven Harvest looks beyond the surface, considering where each variety began and why it was created. Each starts as a vision—an idea of what could be—and is guided through years of breeding and selection to meet a specific need. Along the way, it is shaped by the hands that nurture it and the fields where it is tested, becoming a reflection of dedication, discovery, and purpose.

Wow Factor

Every garden deserves a little “wow!” From abundant harvests and vibrant colors to bold, unforgettable flavors, these are the varieties that spark conversation and inspire pride. Proven Harvest seeks out true garden standouts—selections that turn heads, start stories, and bring an extra sense of excitement to every garden.

Bulletproof

Great results start with reliable performance. Gardeners—whether just beginning or highly experienced—deserve varieties they can count on. That’s why Proven Harvest prioritizes consistent, dependable performance in every selection, choosing high-quality genetics that help ensure success season after season.

Collections

✓ Garden Grown

Homegrown begins here! With these garden-ready plants, you'll find hard-to-beat, all-around garden stars focused on delivering abundant harvests for beginners and experts. Garden Grown is the ideal combination of the garden classics but with improved plant performance, taste, and nutritional benefits.

✓ Petite Patio

Patio-perfect varieties offer manageable "mini-me" versions of the tried-and-true garden classics but without the work and extended care. Consumers can enjoy patios and small urban spaces filled with mature vegetable plants in containers or lush hanging baskets while maximizing space and winning on yield without sacrificing amazing taste.

Pot Sizes

Garden Grown Collection

Container size selections ensure each plant has the correct space required to thrive based on its growth habit while also accounting for the needs of different retail environments.
