Pricing is subject to change due to market conditions. Please see the online order form for current pricing.

Bee Friendly

Netherland Bulb Company is committed to the safe pollination of flowers by bees and other animals. It is in all of our best interest to promote a healthy ecosystem. We supply flower bulbs and perennials all over the world.

We encourage our large network of growers to eliminate the use of harmful chemicals completely. And if that is not possible, to minimize usage to regulatory guidelines and never use during pollination timeframes.

Many of our premium flower bulbs are grown without such chemicals, denoted by the Bee Friendly icon. Our growers do caution that some products may have been grown in fields where chemicals were used in the past, therefore minute traces may exist if tested.

Social Media

We can help you connect with your customers–and boost your sales. Even the most avid gardeners need inspiration and the occasional planting reminders. Social media is an easy and free way to do this! We provide content for you to post on your own social media accounts.
